DETAILED ACTION

Claim Objections

Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-10 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gehlot '277.

The patent to Gehlot discloses a a method for operating a driver information system 60 that sensors 48 for inputing operating data as well input ports 54 and 56 that can receive driver profile data as recited in column 4, lines 60-67. In regard to claim 2, figure 2 shows that a selection is made by device 60 as to the type of information output to the driver on the right side of the control block. In regard to claims 3 and 4, note the input 54 of figure 2.
